REASONS FOR ALLOWANCE

1. Claims 1-15 are allowed. The following is an examiner's statement of reasons for allowance.
2. Regarding claim 1 and in light of Applicant's arguments (see page 2, lines 13-22, filed April 2, 2007), the prior art fails to disclose or fairly suggest a diffractometer, including means for moving an analytical unit with respect to a support and movement structure permitting the rotation of an equatorial plane around an equatorial axis, without said support and movement structure changing its position, and wherein means for moving said analytical unit with respect to a base moves said analytical unit to change a position of said equatorial axis with respect to said base, in combination with all the limitations in the claim. Claims 2-11 are allowed by virtue of their dependency.
3. Regarding claim 12 and in light of Applicant's arguments (see page 2, lines 13-22, filed April 2, 2007), the prior art fails to disclose or fairly suggest a diffractometry method, including positioning a diffractometer including means for moving an analytical unit with respect to a support and movement structure permitting the rotation of an equatorial plane around an equatorial axis without the equatorial axis changing its position and means for moving the analytical unit with respect to a base moving said analytical unit to change a position of said equatorial axis with respect to said base, in combination with all the limitations in the claim. Claims 13-15 are allowed by virtue of their dependency.
4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
